LinkedIn | GitHub | Portfolio

Fullstack Engineer with hands-on experience since 2019 designing and building backend and frontend systems (Spring Boot, Node.js, React/Next.js) for production business applications, complemented by SAP IBP data integration and functional consulting experience. Comfortable owning a project across the full development lifecycle – from stakeholder requirements to deployment – in multicultural, English/Spanish-speaking environments.

Core Competencies

- **Backend**: Spring Boot, Node.js, REST API design, database integration.
- **Frontend**: React, Next.js, TypeScript, JavaScript.
- **Programming & Automation**: Java, Python, SQL, process automation, data cleaning.
- **DevOps & Infrastructure**: Docker, Kubernetes, AWS, Azure.
- **Data & Monitoring**: PostgreSQL, Grafana, ElasticSearch.
- **ERP & Planning**: SAP IBP data integration, SAP BTP, SAP Cloud, SAP CIDS.
- **Tools**: Git, GitHub, AI-assisted development (Claude Code, GitHub Copilot).

Professional Experience

Bizbrain Technologies **Montevideo, Uruguay**

- *SAP IBP Consultant & Data Integration, Full time 2025–Present* - Support SAP IBP planning processes through data integration, validation, troubleshooting, and business-user assistance across 5 client engagements.
  - Monitor and validate planning data loads to ensure consistency across supply chain planning scenarios.
  - Collaborate directly with business stakeholders to resolve planning and integration issues.

Infoserv Technologies **Uruguay, remote (in parallel)**

- *Fullstack Engineer* *2019–2025*
  - Designed and built the backend and frontend for a car rental management platform (React/Next.js/TypeScript, Node.js, Spring Boot), covering the full vehicle lifecycle: reservation, rental, return, cleaning, maintenance, and return to available fleet.
  - Developed backend logic for a local delivery company covering package intake and warehouse location tracking, in/out registration, delivery time estimation with sender notifications, and shipment cost calculation.
  - Built and maintained REST APIs and database integrations using Spring Boot and Node.js, supporting multiple production business applications.
  - Automated internal and external data workflows with Python, including dataset cleaning and cross-team data analysis.
  - Deployed and maintained services with Docker, supporting infrastructure tasks across client projects.

Mercado Libre **Uruguay, remote**

- *Fraud Prevention Analyst* *2021–2023*

- Investigated suspicious financial activity and fraud patterns, conducting risk assessments and chargeback analysis. - Analyzed large-scale transaction datasets to identify anomalies and reduce financial risk exposure.

Education

- **Universidad Tecnologica (UTEC)** **Uruguay**

  Bachelor's Degree in Computer Science *2022–2026*

Certifications

- Complete Full-Stack Web Development Bootcamp – Udemy (2022)
- iOS & Swift Development Bootcamp – Udemy (2024)

Languages

- Spanish (native), English (C1).
